

Ali Junaid

Bachelor in Computer Science

Lahore, Pakistan ☎ +92-335-0400721 # junaiddev48@gmail.com

Professional Summary

Final-year BS Computer Science student with strong foundations in software development, web technologies, and database systems. Experienced in full-stack development through internship and academic projects. Passionate about building scalable applications and seeking an internship to apply technical knowledge and gain hands-on industry experience.

Education

BS Computer Science

2022 – Present

University of Agriculture, Faisalabad

Pakistan

Experience

Full-Stack Developer Intern

Apr 2025 – Aug 2025

Subtle Marketing

- Customized and maintained client websites based on business requirements.
- Contributed to the development of a service-based accounting platform.
- Developed backend APIs and implemented responsive frontend interfaces.
- Collaborated with senior developers on feature development and debugging.
- Worked on live project: hifsakhansalon.com

Projects

Crop Disease Detection Web Dashboard (Final Year Project)

- Developing a web-based crop disease detection system using deep learning for automated plant health analysis.
- Collected and prepared dataset covering 8 different crop types for model training and evaluation.
- Applied data preprocessing techniques including cleaning and normalization to improve model performance.
- Training a MobileNetV2-based convolutional neural network for image classification of crop health conditions.
- Designed a web dashboard enabling users to upload crop images or capture images via live camera input.
- System detects whether the crop is healthy or diseased and identifies disease type along with possible treatment suggestions.

Smart Home Automation System

- Designed and developed an IoT-based home automation system using Arduino.
- Integrated sensors and actuators to control home appliances efficiently.
- Implemented control logic and tested system performance.

Crypto Price Tracking & Prediction Discord Bot

- Developed a Discord bot to track real-time cryptocurrency prices and provide 24-hour trend-based insights.
- Implemented price prediction features and stock/availability tracking for multiple cryptocurrencies.
- Added alert system to notify users when price changes exceed defined thresholds.
- Integrated CoinGecko and Finnhub APIs for real-time market data retrieval.
- Built using JavaScript and Discord.js for bot functionality and user interaction.
- Deployed the project using Railway and Vercel with GitHub repository hosting.

Technical Skills

- **Programming:** Python, JavaScript, C++
- **Web Technologies:** HTML5, CSS3
- **Databases:** MySQL
- **Tools:** Git, GitHub, VS Code, Microsoft Office
- **Soft Skills:** Problem Solving, Team Collaboration, Analytical Thinking, Quick Learner

Certifications

- Create a Lead Generation Messenger Chatbot using Chatfuel (Coursera _____)
- Foundations: Data, Data, Everywhere (Google _____)
- Ask Questions to Make Data-Driven Decisions (Google _____)

Additional Experience

- Completed academic and self-driven projects simulating real-world software development, including requirement analysis, backend development, and deployment.

Languages

- Urdu (Native), English (Professional Working Proficiency)
